Bolckmans N.V.
T.a.v. dhr. B. Mertens
Industrieweg 4

2320 Hoogstraten

8 May 2009

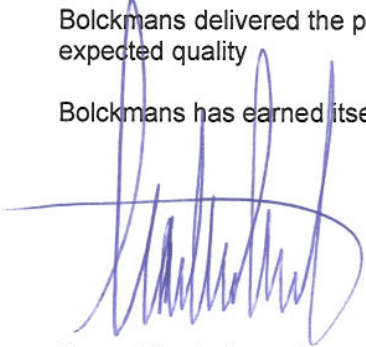

To whom it may concern

Bolckmans was selected to build a warehouse extension and operational offices in our newest facility in Boom, Belgium. The main criteria for selecting Bolckmans amongst a dozen of others is their ability in maintaining the budget and adhering to an aggressive schedule besides their unique experience in the foundation works in the neighbourhood of this facility

The onsite superintendent, engineer and staff assigned to our project were outstanding and second to none; the ability of the superintendent to coordinate complex activities of other trades (mechanical, electrical, etc.) earned him the job of managing – for TNT - the fast tracked complex retrofit activities of the 1,200 m² existing offices in this Boom facility.

Bolckmans delivered the project - to the full satisfaction of TNT - within the exact schedule, lower budget and expected quality

Bolckmans has earned itself partnership in our future projects in Belgium.
